Benefits Of Investing In A Second Citizenship

GLOBAL MOBILITY

Many countries around the world make the passports of other countries restrictive in terms of mobility, requiring citizens to obtain visas whenever they need to travel abroad. If you have to get visas every time you need to travel to a country, it is an expensive, time consuming, frustrating and stressful process. A second passport is the ideal solution to reduce these inconveniences by providing increased global mobility. Did you know that some passports allow visa-free entry to only 40 countries while other passports allow visa-free entry to 160 countries?

SECURITY

A second passport from a stable, peaceful and secure country can save your life and that of your family if you are from a country where political, economic or even climatic threats can arise at any time. A second citizenship is an ultimate and invaluable insurance policy for investors and their families.

TAXATION

Depending on various criteria, having a dual citizenship may prove advantageous for tax mitigation purposes. Certain nation only tax income earned from that country and do not subject capital gains to taxes either; others don't tax foreign sourced income even if remitted. This could potentially enable you to reduce your global tax burden legally, and manage your wealth more effectively and efficiently.
